Front End Development

PROJECTS

Movie Finder – [GitHub](#) - [Demo](#)

- Single page App (SPA) built with the React framework.
- Mobile first responsive layout with Flexbox and custom media queries.
- Data consumed from the TMDB API using fetch.
- State managed using react hooks

Neighborhood – [GitHub](#) - [Demo](#)

- Single page application built with HTML5, CSS3, JSX, React and JavaScript.
- Developed using the Google maps API and third-party API from Fourth square.
- Project initialized using create-react-app

CAREER OBJECTIVE

Front end developer with a strong passion for coding and the web. I have years of experience helping companies to grow and providing a better user experience, using modern techniques and tools. I am always on the path to learning new skills that will help your company succeed and keep growing.

EXPERIENCE

SOFTWARE ENGINEER/FRONT END

Airship

Jan 202 – Nov 2022

- Created and maintained web apps for various clients with high volume traffic.
- Used the React ecosystem and Redux daily to create beautiful UI's as per requirements and specifications.
- Coded great user experiences in React Native for a big app used by thousands of users on iOS and Android.
- Collaborated with product team members, PM's, and Designers to implement new feature developments.
- Developed new experiences with a mobile-first approach and responsive design.

FRONT END / UX ENGINEER

Power Home Remodeling Group

May 2021 – Jan 2022

- Build and maintain React components.
- Create forms and validation testing using JavaScript and Typescript.
- Code new UI's using CSS preprocessors like Sass.
- Provide support for internal design system called Playbook.
- Develop integration of new components from playbook to internal platform called Nitro.

FRONT END DEVELOPER

Darden Restaurants

June 2019 - April 2020

- Built and designed different A/B testing experiences for multiple brands.
- Coded new user experiences with jQuery and JavaScript, ensuring cross browser compatibility.
- Increased revenue in the six figures for food chain stakeholders, by coding new experiences inside of Adobe Target.
- Implemented Analytics tracking on different components throughout the websites, using Data Tag Management (DTM) to validate evans, props and events are firing according to the SDD.
- Created unit-testing with JavaScript and Jest, ensuring code reliability in production environment.
- Refactored code using Typescript

Robofriends – [GitHub](#) - Demo

- Single page application created with React.
- Data consumed and fetched from a REST API called robohash.
- State management and component rendering done by using react hooks.
- Mobile first layout using Flexbox.

- Worked closely with the brand creative's team, on artistic digital design and provided animations, CSS, and final HTML output.
- Participated with marketing, optimization analysts and implementation engineering team to develop innovative ways to deliver optimized content based on the user's persona.

FRONT END DEVELOPER

Visit Orlando

October 2018 - April 2019

- Coded forms validations, DOM manipulations and CSS animations with JavaScript and jQuery.
- Helped build and optimize more than 1000 webpages in 3 different languages.
- Developed webpages using HTML, CSS and JavaScript using a custom content management system (CMS) called Agility.
- Utilized Jira to report progress and manage workflow.
- Followed Agile Scrum methodologies to ensure project deliverables were met.
- Ensured appropriate use of SEO and web development best practices.
- Collaborated with team members to problem solve critical issues.
- Developed and applied polyfills to the sites, ensuring cross browser compatibility and performance.
