Project Management:	Jira, Remedy
Module Bundler:	Webpack, Parcel
Deployment:	Amazon S3, Netlify, FTP Server, GitHub-Pages
Spoken Languages:	English, Spanish

SUMMARY

Front end developer with a strong passion for coding and the web. I have years of experience helping companies to grow and provide better user experience, using modern techniques and tools such as JavaScript, HTML, CSS3, Typescript, Sass, and Bootstrap. I am always on the path to learning new skills that will help your company succeed and keep growing.

PROFESSIONAL EXPERIENCE**Darden Restaurants - Front End Developer [A/B Testing]**

June 2019 – April 27, 2020

- Responsible for the development and design for A/B testing experiences for multiple brands
- Code new user experiences with jQuery and JavaScript, ensuring cross browser compatibility by adding prefixes and polyfills
- Use modern JavaScript techniques like arrow functions, closures, classes and template literals to different brand experiences on a need basis
- Have increased revenue in the six figures for food chain stakeholders, by coding new experiences inside of Adobe Target
- Implement Analytics tracking on different components throughout the websites, using Data Tag Management (DTM) to validate evens, props and events are firing according to the SDD
- Create unit-testing with JavaScript and Jest, ensuring code reliability in production environment
- Write JavaScript with Typescript to enforce data types and avoid implicit type coercion that could lead to bugs
- Spear heading Recommendations Engine project using Adobe target
- Ensure audience, tracking and KPI's are met as per the brand requirements
- Use DOM manipulation and event listeners to transform current UI and create new ones
- Debugging and peer code review using Upsource
- Create pull requests on TFS after code meets requirements and code review is approved
- Work with various JavaScript tools/technologies/frameworks such as jQuery
- Continuously refactor and optimize the system to improve the efficiency and quality of the development cycles
- Create awesome UI's with CSS preprocessor like Sass and frameworks like Bootstrap
- Work with Digital platform team on RESTful API requests by using the fetch API and AJAX
- Work with the brand creative's team, on artistic digital design and provide animations, CSS, and final HTML output
- Collaborate with brand and implementation engineering team to develop innovative ways to deliver optimized content based on the user's persona
- Daily Scrum meetings to share project deadline status and/or roadblocks with project manager and engineering team

Visit Orlando – Front End Developer

October 2018 - April 2019

- Coded forms validations, DOM manipulations and CSS animations with JavaScript and jQuery
- Helped build and optimize more than 1000 webpages in 3 different languages
- Developed webpages using HTML, CSS and JavaScript using a custom content management system (CMS) called Agility
- Utilized Jira to report progress and manage workflow
- Followed Agile Scrum methodologies to ensure project deliverables were met
- Ensured appropriate use of SEO and web development best practices
- Collaborated with team members to problem solve critical issues
- Developed and applied polyfills to the website, ensuring cross browser compatibility and performance
- Developed reports, dashboards, and processes to continuously monitor data quality and integrity using Salesforce CRM tool.

PROJECTS

Movie Finder – [GITHUB LINK](#) - [LIVE DEMO](#)

- Single page App (SPA) built with the React framework
- Mobile first responsive layout with Flexbox and custom media queries.
- Data consumed from the TMDB API using fetch
- State managed using react hooks

Neighborhood Map – [GITHUB LINK](#) – [LIVE DEMO](#)

- Single page application built with HTML5, CSS3, JSX, React and JavaScript.
- Developed using the Google maps API and third-party API from Fourth square.
- Project initialized using create-react-app

Robofriends – [GITHUB LINK](#) – [LIVE DEMO](#)

- Single page application created with React
- Data consumed and fetched from a REST API called robohash
- State management and component rendering done by using react hooks.
- Mobile first layout using Flexbox

EDUCATION

Florida State University – B.S. Computer Science

December 2017

Udacity – Front End Developer Nanodegree certification

November 2018

HONORS

UPE Honor Society for the Computing and Information Disciplines -- Florida State University
